

Statewide Staging Systems at the Perth Motor Show

In recent months Statewide Staging Systems have proved their versatility in meeting client's specific needs. This was achieved recently at the Perth Motor Show through their new *Layher Event Scaffolding* system and *Statewide manufacturing*. Thousands of potential 4WD customers enjoyed testing vehicles over an obstacle course which included a 3m high scaffold ramp and a heavy duty steel constructed see saw, built especially for the event.

Layher Event Scaffolding is a versatile product new to WA, but has enjoyed industry standard status across Europe and the world for some time. Being a product designed for events Layher has many accessories that produce outstanding results both practically and in final presentation.

Statewide Manufacturing employs fully qualified and experienced engineers and boilermakers and are open for business in customised fabrication and installation of aluminium and steel products.
